PROJECTS

•EduNova-An EdTech Platform *React.js, Node.js, Express.js, MongoDB, JWT, Razorpay, Nodemailer* [🔗 Source Code](#)

- User Authentication: Implement secure user authentication for both instructors and students.
- Course Creation: Allow instructors to create and publish courses, including adding content such as lectures, quizzes, and assignments.
- Course Marketplace: Provide a marketplace where students can browse and purchase courses based on their interests.
- Dashboard: Provide instructors with a dashboard to manage courses and offer students a dashboard to view enrolled courses, track progress, and access course materials.

•HeistINN-Heist food online *MERN Stack, Tailwind CSS, JWT Auth, Razorpay Payment* [🔗 Source Code](#)

- A food ordering web app made using Swiggy Api, allowing user to create account, order food, and see their past orders.

•Weather App *HTML, CSS, JavaScript* [🔗 Source Code](#)

- This weather web app seamlessly integrates OpenWeather API, allowing users to easily search and retrieve current weather information for any city.
- With a user-friendly interface, the application not only provides accurate and up-to-date weather data for specified locations but also offers the convenience of instant weather updates based on the user's current location.

•Random GIF Generator *React, Tailwind CSS* [🔗 Source Code](#)

- Fetch GIF according to the input field from a third-party API.
- It also generates random GIFs.
